## Philosophy

Over the long term, earnings growth is the primary driver of total shareholder returns. We manage your portfolio as a single diversified growth company producing an underlying portfolio free cash flow growth rate of at least 12% and translating that into strong secular absolute and relative returns.

*Our objective is to translate*  
**HIGH PORTFOLIO FREE CASH FLOW GROWTH**  
*into*  
**CLIENT RETURNS**

**We manage the portfolio as if it were a single, diversified growth company.**

*Invest in businesses, not stocks, to fully participate in our holdings' dynamic free cash flow growth with low turnover.*

**Duration and growth are preeminent.**

*Target 12% minimum free cash flow growth for every holding to produce strong absolute as well as relative long-term portfolio investment returns.*

**Opportunity for growth determines decisions, not benchmark.**

*High conviction portfolio of 18 to 25 companies to increase probability of achieving objective.*

The Select Mid Cap Growth composite is compared to the Russell MidCap® Growth Index. The benchmark is most reflective of the objectives and holdings of the style. The composite includes all fully discretionary portfolios invested in Peregrine’s Select Mid Cap Growth strategy. Net performance includes the effect of advisory or performance fees. For the period presented, the composite consisted only of seed money, which does not pay an advisory fee. Therefore, the net performance number was calculated by applying the highest fee that Peregrine charges for this strategy. Actual fees charged are based upon a tiered fee schedule reflected in our Form ADV, Part 2A. Both gross and net performance reflect the reinvestment of dividends and interest, and the deduction of brokerage or other commissions, and any other expenses that a client would have paid or actually paid, other than custodial fees. Past performance is no guarantee of future results. As with any investment there is always potential for gains as well as the possibility of losses.
